GENERAL CATALOGUE

CATÁLOGO GENERAL

PHILOSOPHY
FILOSOFÍA

The creation of ITT, is the result of a project based on our long experience in the ceramic industry, being an established company in the market, with years of experience behind us yet, a company that believes in a work well done and with broad future horizons. Our philosophy is based on the values of quality work, innovation, expertise and service.

Our main objective is to maintain a preferential and direct contact with all our clients, offering personal attention and dedication that seeks maximum satisfaction, which is the engine of our goals that are reached through perseverance, enthusiasm and involvement.

The innovation, just as much in the field of technology and design as in the process of management and organization, is a clear bet of our company and an investment of the future. The experience of ITT Ceramic, with more than 35 years of working in the ceramic sector, is an added value and security asset when it comes to trusting our company.

All of this has taken ITT Ceramic to be, right know, one of the leading companies of this sector in volume of sales, quality of the product, at the forefront of design and international presence.

La creación de ITT, es el resultado de un proyecto basado en nuestra larga experiencia en el sector cerámico, siendo una empresa consolidada en el mercado, con años de experiencia que nos avalan y a la vez, una empresa que cree en el trabajo bien hecho y con un amplio futuro en sus horizontes. Nuestra filosofía de trabajo se basa en los valores de calidad, trabajo, innovación, experiencia y servicio.

Nuestro principal objetivo es mantener un contacto directo y preferente con todos nuestros clientes, ofreciéndoles un trato personal y una dedicación que busca la máxima satisfacción, siendo el trabajo el motor de nuestras metas, el cultivo de una labor dirigida a un claro resultado al que solo se llega a través de la perseverancia, entusiasmo e implicación.

La innovación, tanto en la tecnología y el diseño como en el proceso de administración y organización, es la apuesta de nuestra compañía y una inversión de futuro. La experiencia de ITT Ceramic, con más de 35 años trabajando en el sector de la cerámica, es un valor añadido cuando se trata de confiar en nuestra compañía.

Todo esto ha llevado a ITT Ceramic, hasta ahora, a ser uno de los principales de este sector en volumen de ventas, calidad del producto y a la vanguardia en diseño y con presencia internacional.

SUSTAINABLE DEVELOPMENT
DESARROLLO SOSTENIBLE

At ITT Ceramic, we are committed to our environment and the future of our planet. That is why our commitment to reducing our environment impact goes beyons our own facilities, as we design products that contribute to minimising energy consumption.

Our Environment Management Plan includes actions that drastically reduce the negatve impact that the industry has on the planet. This has allowed us to obtain various certificactions that support our commitment to the environment.

En ITT Ceramic estamos comprometidos con nuestro entorno y el futuro de nuestro planeta. Es por ello que la reducción del impacto ambiental de nuestra actividad va más allá de nuestras propias instalaciones, diseñando productos que contribuyen a reducir el consumo energético.

Nuestro Plan de Gestión Ambiental apuesta por acciones que disminuyen de forma contudente el negativo impacto que tiene la industria sobre el planeta. Esto nos ha permitido obtener diferentes certificaciones que avalan nuestro compromiso con el medio ambiente.

CERTIFICACIONES AMBIENTALES · ENVIRONMENTAL CERTIFICATIONS

PIONEERS INDUSTRY 4.0
PIONEROS INDUSTRIA 4.0

Digitalisation and the continuous improvement of its processes are two of ITT Ceramic firmest commitments. The company is one of the first tile companies to implement an Industry 4.0 system, which will turn traditional factories into a smart production industry. Currently, the company uses MOM (Manufacturing Operations Management) management software as well as digital tools such as Big Data, IoT (Internet of Things) and Machine Learning, which links all the factory's systems, thus keeping all relevant data in a single point. Each piece also has its own QR code, allowing for end-to-end traceability as you can check the pieces' manufacturing data at any time, as well as optimisation and continuous improvement of processes. We are also working on implementing marketing tools within the QR code so that, in addition to all the manufacturing information, customers can have access to everything they need for the sale from the moment they receive the ceramic pieces.

La digitalización y la mejora continua de sus procesos son dos de las firmes apuestas de ITT Ceramic. La compañía es una de las primeras empresas cerámicas en la implantación de un sistema de industria 4.0 que convertirá la fábrica tradicional en una industria de producción inteligente. Actualmente, la empresa cuenta con un software de gestión MOM (Manufacturing Operations Management) junto con habilitadores digitales como el Big Data, IoT (Internet of Things) o Machine Learning, que integra todos los sistemas de la fábrica, consolidando así los datos relevantes en un único punto. Cada pieza dispone, además, de su propio código QR, que permite conseguir una total trazabilidad, pudiendo consultar en cualquier momento los datos de fabricación de las piezas, así como la optimización y mejora continua de los procesos. También se está trabajando en la implementación de herramientas de marketing dentro del código QR, para que, además de toda la información de fabricación, el cliente pueda contar con todo lo necesario para la venta desde el momento en el que recepcione las piezas cerámicas.

CERTIFICATIONS
CERTIFICADOS

SGS Certification, for implementing and maintaining a Quality Management System in the field of design, development, manufacture and marketing of ceramic tiles that meet fulfills the requirements of the following standard ISO 9001:2015 Register Number ER-0498/2020.

Certificación de SGS para la aplicación y mantenimiento de un Sistema de Gestión de Calidad en el ámbito de diseño, desarrollo, fabricación y comercialización de baldosas cerámicas que cumplen con los requisitos de Norma ISO 9001:2015 Número de registro: ER-0498/2020.

LAYING & MAINTENANCE
COLOCACIÓN & MANTENIMIENTO

Correct, careful laying of ITT Ceramic's products is vital for taking full advantage of their technical characteristics. (Standard of reference: UNE 138002) For this reason, the following points are necessary:

1. Check the calibre, tone and quality of the product before laying.

2. Choose appropriate installation tools (toothed trowel, white rubberhammer, suction grip and rubber trowel for pointing).

3. Ensure that the surface on which the material is to be laid is level, clean and insulated from damp.

4. Pay special attention to the type of adhesive to be used (consult the habitual adhesive supplier), since each type of ceramic requires the appropriate adhesive. (Standard of reference: EN-1348).

5. The professional responsible for laying the material must choose the appropriate joints between pieces and the perimeter joints, in order to guarantee correct absorption of structural movements, and an allowance for dimensional tolerances of the product. ITT Ceramic recommends laying the tiles with a minimum joint between 1,5 mm to 3 mm thickness, depending on thickness and format (Always consult the standard UNE 138002) and checking for other indications given on the box (measurements between calibres, recommended joint).

6. Do not use coloured pointing material containing black smoke (micronised carbon) or dyes which can hamper the cleaning of the tiled surface.

7. Clean off excess pointing material from the surface of the tiles when it is still fresh, using a sponge and clean water; never use hard materials that could scratch the tiles, such as metal spatulas or abrasive scourers. Always follow the recommendations given by the adhesive manufacturer.

6. Once the tiles are laid, avoid working in the tiled zone (plastering, painting, placing scaffolds/ladders, projecting metallic fragments from disc grinders, moving tools, dragging heavy objects, moving remains of abrasive building materials, etc.) If this cannot be avoided, always protect the tiles and joints to prevent problems of cleaning or deterioration.The materials used for this protection must not be harmful or contain chemical products which may damage the tilling.

Una colocación adecuada y cuidadosa de los productos fabricados por ITT Ceramic es vital para hacer resaltar al máximo las características técnicas de los mismos. (Norma de referencia UNE 138002). Por este motivo, es necesario:

1. Verificar el calibre, tono y calidad del producto, antes de la colocación.

2. Escoger herramientas de instalación adecuadas (llana dentada, maza de goma blanda, ventosa y llana de goma para la aplicación de la junta).

3. Que la superficie sobre la cual vaya a instalarse el material esté nivelada, limpia y aislada de la humedad.

4. Prestar especial atención al tipo de adhesivo a utilizar (consultar con el proveedor habitual de adhesivos), dado que cada tipo de cerámica requiere el adhesivo adecuado. (Norma de referencia: EN-1348 y UNE 138002).

5. El profesional responsable de la colocación del material, debe elegir adecuadamente las juntas entre piezas, así como las juntas perimetrales, de manera que se garantice una correcta absorción de movimientos estructurales, y una compensación de tolerancias dimensionales del producto. ITT Ceramic recomienda colocar la cerámica con una junta mínima de entre 1,5 mm y 3 mm dependiendo de espesor y formato (consultar siempre la norma UNE 138002) y comprobar si en la caja hay otras indicaciones (medidas entre calibres o junta recomendada).

6. No se debe utilizar junta de color que contenga negro de humo (carbón micronizado), ni tintes que pueden dificultar la limpieza de la superficie revestida.

7. Limpiar los restos de rejuntado de la superficie de las baldosas cuando aún están frescos, utilizando una esponja con agua limpia; en ningún caso deben utilizarse materiales que presenten alta dureza y puedan rayar el producto cerámico tales como espátulas metálicas o estropajos abrasivos. Siempre se deben seguir las recomendaciones indicadas por el fabricante de adhesivos.

8. Una vez colocado el azulejo, hay que evitar las operaciones en la zona alicatada (enyesado, pintura, colocación andamios/escaleras, proyección de restos metálicos de radiales, trasiego de herramientas, arrastre de objetos pesados, resto de materiales abrasivos de obra, etc.), en caso contrario, siempre hay que proteger las baldosas y las juntas para evitar posteriores problemas de limpieza o deterioro. El material que se use para esta protección no debe dañar ni contener productos químicos que dañen al azulejo.

Special for laying steps:

The substrate must be perfectly clean and smooth.
Begin laying from the top downwards.
A good preliminary rethinking by the Facultative Direction is recommended.
Do not leave any zones without cement glue.
Fill completely the gap between the wall and the lower edge of the step. Always place the riser at the same level as the step.
It is recommended to protect the step surfaces while working. Avoid direct blows to the steps both during and after installation.

Especial colocación de peldaños:

El soporte estructural debe estar totalmente limpio y enrasado en superficie.
Se recomienda un buen replanteo previo por parte de la Dirección Facultativa.
Empezar la colocación desde arriba hacia abajo.
Es imprescindible no dejar zonas sin cemento cola.
Macizar completamente el hueco entre la pared y el borde interior del peldaño.
Colocar siempre la tabica (contra-huella) al mismo nivel que el peldaño.
Se recomienda la protección del peldaño durante la obra.
Se deben evitar golpes directos a los peldaños durante la obra y una vez instalados.

Special for laying rectangular formats:

When laying rectangular formats discontinuously, never do so in the centre of the piece.
In order to maintain the aesthetic appearance and avoid difficulties in installation, we recommend that discontinuous laying does not exceed 25% of the side to which it is applied.

Especial colocación de formatos rectangulares:

La colocación a rompejunta de formatos rectangulares nunca debe realizarse en la mitad de la pieza.
Se aconseja que para mantener la estetica y evitar dificultades en su instalación, la colocación a rompejunta no supere el 25% del lado sobre el que se aplica.

INNOVATING TRENDING TILES
By SANICERAMIC

During fixing:

Once the tiles have been fixed, it will be necessary to provide adequate protection against possible damage during subsequent building work, covering them with cardboard, thick, carpet or plastic.

Durante los trabajos de ejecución:

Dado que el pavimento no es el último elemento a colocar en una obra, será necesario una vez instalado darle una adecuada protección frente a posibles daños que pudieran ocasionar trabajos posteriores, para lo cual deberá cubrirse con cartón, moqueta o plásticos gruesos.

Cleaning after fixing:

Residues remaining after work completion can be easily removed with a commercial detergent or an acid-based one, always considering the chemical resistance indicated by the manufacturer. When using cleaning products the following general considerations should be taken into account:

- Acid cleaning should never be carried out on recently laid floor tiles. The reaction of the acid with the unset cement may damage the joints or deposit insoluble compounds on the surface.
- It is recommended to soak the surface with clean water before using any chemical agent. This prevents the grouts from absorbing these agents. Clean the surface with water immediately after the treatment to remove any remain of the chemical products.
- Trowels and abrasive scourers must not be used. The use of sponges is strongly recommended, especially natural ones.
- The fixing by a professional tiler is highly recommended for getting the best performance.

Limpieza inicial después de haber colocado los azulejos:

Los restos de suciedad que se generan tras la puesta en obra se eliminarán fácilmente con un desincrustante comercial o, en su defecto, con un detergente de base ácida, si bien deberá tenerse en cuenta la resistencia química indicada por el fabricante de las baldosas. Para la utilización de productos de limpieza, deberán tenerse en cuenta las siguientes consideraciones generales:

- Nunca debe efectuarse una limpieza ácida sobre pavimentos recién instalados, porque el ácido reacciona con el cemento no fraguado, pudiendo deteriorar las juntas o depositar compuestos insolubles sobre su superficie.
- Es conveniente impregnar la superficie con agua limpia previamente a cualquier tratamiento químico, previniendo así la posible absorción de los agentes utilizados por el material de rejuntado, y aclarar con agua inmediatamente después del tratamiento para eliminar los restos de productos químicos.
- No deben utilizarse espátulas metálicas ni estropajos abrasivos, siendo adecuadas las esponjas, preferentemente naturales.
- Este tipo de operaciones deben ser realizadas por personal experimentado, teniendo en cuenta las características de las baldosas y las recomendaciones del fabricante.

Routine care:

Daily cleaning of stoneware tiles is particularly simple, it only requires clean water to which an alkaline base cleaner may be added.
The use of waxes, oils or similar products is not recommended since the non-porous glazed surface prevents from a correct application.
It may occasionally occur that stains cannot be fully removed with a commercial detergent, making necessary to use solvents or specific cleaning agents. It is recommended to firstly check the chemical resistance of the tile and, as an extra precaution, test in a clean, spare tile or in non-visible area.

Cuidado ordinario:

La limpieza cotidiana de las baldosas de gres es particularmente simple ya que únicamente se requiere agua limpia a la que puede añadirse un detergente de base alcalina.
No se recomienda el uso de ceras, aceites o productos similares ya que la nula porosidad de la superficie vidriada impide la correcta aplicación.
Eventualmente, podemos encontrarnos frente a manchas de tipo doméstico que no pueden ser totalmente eliminadas con un detergente comercial, por lo que será necesario el empleo de disolventes o agentes limpiadores específicos.
Deberá consultarse previamente la clase de resistencia química de la baldosa y, para mayor seguridad, es conveniente hacer una prueba de la limpieza sobre piezas de reserva o en un lugar poco visible.

Important:

Hand-painted ceramic wall tiles or complementary pieces on third and fourth firing must be treated with extreme care during both the fixing and subsequent cleaning, as well as during ordinary routine cleaning. The use of pure or diluted acids, detergents or other corrosive products will seriously harm their original look.

Muy importante:

Los azulejos y piezas complementarias pintadas a mano y aquellas con efectos de lustres, nacarados y oros deben ser tratados con delicadeza durante los procesos de colocación y posterior limpieza, así como durante su cuidado ordinario, ya que la utilización de ácidos puros o diluidos, detergentes u otros productos corrosivos alteran de forma importante su apariencia original.
